

"I was incredibly fortunate to have a great support network fostering my love of science (family and teachers) and to have been involved in the Delaware Valley Science Fair as a student. It was great as a young introvert to find a community of science loving friends and to get some experience thinking about my project and communicating about it with people I did not know."

Rob Studt
Johnson & Johnson, United States
Head of Quality Analytics, R&D Quality

DEGREE: B.S. in Chemistry, Pennsylvania State University (1990)

Rob is currently the head of Quality Analytics in Johnson & Johnson's BioResearch Quality & Compliance. He began his career as a drug discovery chemist, and has worked in leadership roles in Drug Discovery, R&D IT, and Quality & Compliance in the pharmaceutical industry. Current areas of responsibility include applications of Data Science and Intelligent Automation, data strategy and enablement, and digital innovation aimed at increasing quality while reducing time and cost in Quality & Compliance.

DVSF: 1981-1982

DVSF Judge: 20 years
