

DVSVF: 2006 – 2012

“I developed a passion for the sciences by participating in DVSVF. I have pursued and leveraged that passion through a career in chemistry and healthcare consulting.”

Andrew Romine, PhD
Consultant focused on Digital Strategies in Healthcare
Boston Consulting Group

DEGREE: Scripps Research (NSF Fellow), Ph.D. in Chemical and Biological Sciences (2021)
Quantic School of Business and Technology, M.B.A. (2021)
California Institute of Technology, B.S. degrees in chemistry, business, economics, and management (2016)

Andrew's passion for research led him to Caltech for his undergraduate studies where he studied thermoelectrics in the Snyder lab, inorganic chemistry in the Grushin lab (ICIQ), and metal-free catalysis in the Grubbs lab. After graduating, Andrew headed to Scripps Research to study catalytic chemistry in the Engle lab. Still passionate about science, Andrew joined the Boston Consulting Group and advises pharma companies, research universities, and the US government on their digital healthcare strategies.
