

*“DVSF helped me discover my love of science. The microbiology knowledge and research skills I gained through my projects provided valuable stepping stones to my current career as an infectious disease physician.”*

DVSF: 1997 – 2003

ISEF: 2001 – 2003

Anna Lisa De Obaldia, MD  
Assistant Professor of Medicine, Division of Infectious Diseases and Epidemiology  
Penn State Health

DEGREE: Pennsylvania State College of Medicine  
Doctor of Medicine (2015)

Dr. Anna Lisa De Obaldia is an Infectious Disease Specialist in Hershey, Pennsylvania. She graduated from the Pennsylvania State College of Medicine in 2015. Lisa joined the faculty of Penn State College of Medicine in August 2020. She enjoys teaching while rotating on the general infectious service with a team that is typically composed of an infectious disease fellow, internal medicine residents and medical students.

Dr. De Obaldia has been invited multiple times to give a lecture to the internal medicine residents about antiretroviral therapy in HIV, as well as help teach some of the board curriculum lectures for the infectious disease fellows. She also has an interest in tickborne diseases and collaborated with an internal medicine team to coauthor a case study for a patient with Anaplasmosis.

Dr. De Obaldia's clinical interests involve aging in HIV and tickborne diseases.
